Experience

Kopperfield

Full Stack Engineer · July 2025 - Present

- Led web and mobile initiatives from problem definition through launch, including Android and iOS releases.
- Improved application reliability and automated testing across frontend and backend systems.
- Optimized application responsiveness using measured frontend and backend performance.
- Owned subscription and billing workflows, improving reliability and customer experience.
- Evaluated software vendors and negotiated pricing and renewal terms.

Assembly Digital Media

Software Developer · September 2022 - July 2025

Built publishing tools and automation across WordPress, AWS, and AI-assisted editorial workflows.

Earlier at Assembly: part-time developer, May–August 2022; full-stack co-op, September–December 2021.

Earlier experience

Schneider Electric · Software Designer - Co-op · 2021

Island Temperature Controls · Full-stack Software Developer - Co-op · 2019

Independent products

Perspective Labs Inc.

Independent products in development or at prototype stage.

Delve (working name)

Built a property-analysis prototype combining listing extraction, financial calculations, and AI-assisted document analysis with supporting evidence.

Parallax Studio

Built AI video workflows with asynchronous GPU jobs, media processing, progress and failure handling, and usage accounting.

Earbud

Developed a C++/JUCE audio-plugin prototype with calibrated metering, exposure estimates, configurable muting, and DSP tests.

Technical skills

TypeScript, React, Next.js, Python, Django, React Native, PostgreSQL, AWS, C++, JUCE, automated testing, AI integrations, asynchronous job processing.

Education

University of Victoria · Bachelor of Software Engineering, 2022
Specialization in cybersecurity and privacy.
