Experience

Kopperfield

Full Stack Engineer · July 2025 - Present

Sole full-time engineer, owning engineering operations, infrastructure, reliability, and performance. Report engineering progress and priorities in company meetings.

- Reduced a core dashboard API's p75 response time by 88%.
- Built and launched job-site photo capture and annotation for Android and iOS.
- Built automated regression tooling to validate electrical calculations before release.
- Improved reliability to preserve field edits during connection loss and interrupted sessions.
- Automated operations and brought subscription plan changes into the app; owned billing and renewals.
- Evaluated software vendors and negotiated pricing and renewal terms.

Assembly Digital Media

Software Developer · September 2022 - July 2025

- Built a distributed link validation and repair system on AWS Lambda, SQS, and DynamoDB that processed 50K+ links.
- Led development of an LLM-powered WordPress editorial system used by Canadian media teams; mentored co-op developers in TypeScript, React, and backend design.
- Automated product-recall ingestion and publishing to WordPress with AWS CDK and EventBridge.
- Built URL redirect tools for content managers and engineers across WordPress, a Go API, and Express.

Projects

Perspective Labs Inc. · Independent products in development

Tenurel · Property intelligence

Built listing and strata-PDF analysis with Next.js and PostgreSQL, combining deterministic risk scoring and financial calculations with AI summaries and source evidence.

Parallax Studio · AI video & media workflows

Implemented GPU video-generation jobs with Inngest and RunPod, including persisted progress, completion timeouts, failure handling, media storage, and usage accounting.

Earbud · Native audio & DSP

Built a C++/JUCE plugin with A-weighted metering, calibration profiles, and exposure estimates. Added DSP component tests and VST3/Audio Unit build targets.

Technical skills

Languages: TypeScript, Python, Go, C++. **Web & mobile:** React, Next.js, Django, React Native.
Data & systems: PostgreSQL, AWS, OpenAI API, asynchronous jobs, automated testing, JUCE.

Education

University of Victoria · Bachelor of Software Engineering, 2022
Specialization in cybersecurity and privacy.
